Portfolio

Cutting-Edge Visual Effects, 3D & Motion Graphics Solutions Company

We are a specialized VFX studio dedicated to creating seamless, photorealistic visual effects that enhance storytelling across Films, commercials, digital media, and gaming projects. With our robust team structure, advanced technical capabilities, and proven track record of successful international and domestic collaborations, we deliver industry-leading VFX solutions that captivate audiences and elevate creative visions.

We deliver end-to-end visual effects with expertise spanning high-end compositing, advanced roto and paint, match move, and dynamic 3D modeling and motion graphics, we serve as a trusted, full-spectrum partner for projects of any scale and complexity.

Team Strength & Capabilities

Specialized Department Structure

Our team comprises **35 highly skilled VFX professionals** organized into core departments, each with deep expertise and proven execution capability:

Department	Team Size	Core Expertise
Roto & Cleanup	10 Members	Frame-by-frame rotoscoping, paint xes, wire/rig removal, detailed masking, and asset cleanup
Paint & Tracking	10 Members	Digital paint, texture replacement, matte painting, matchmove tracking, and 2D compositing foundations
Matchmove (3D Tracking)	5 Members	Precise camera tracking, 3D point cloud generation, virtual set extensions, and complex motion capture integration
Compositing	5 Members	Advanced compositing, color grading, layer management, nal output delivery, and quality assurance
3D Modeling & Assets	5 Members	Character modeling, environment creation, hard-surface design, texture development, and asset optimization

Total Capacity: 35 dedicated professionals ready to scale rapidly for large-scale international and domestic projects.

Core Service Offerings

Visual Effects (VFX)

- **Seamless Compositing** – Flawless integration of CGI elements with live-action footage
- **Paint / Prep** – Clean removal of technical apparatus from live-action footage
- **Roto / Keying** – Flawless Extraction of mattes from live-action footage
- **Matchmove** – Precise tracking of the cameras, objects and body in a live-action footage.

3D Modelling & Asset Creation

- **Character Modelling** – Detailed, production-ready character assets
- **Environment Design** – Comprehensive world-building and set creation
- **Hard-Surface Modelling** – Mechanical, architectural, and industrial asset creation
- **Texture Development** – Photorealistic material creation and optimization

Motion Graphics & Animation

- **2D Motion Graphics** – Engaging animations combining text, graphics, and visual effects
 - **3D Motion Graphics** – Dynamic animated sequences for branding and commercials
 - **Promotional Content** – Compelling visual narratives for brands, apps, and products
 - **Digital Campaigns** – Simplified visualization of complex ideas into captivating stories
-

Technical Capabilities & Workflow

Robust Workflows & Quality Assurance

- **Comprehensive Project Planning** – In-depth consultations, detailed timelines, resource allocation, and technical assessments
- **Concept Development** – Initial storyboards, scripts, and visual outlines guiding the VFX process
- **Efficient Production Pipelines** – Standardized workflows ensuring consistent output quality and on-time delivery
- **Quality Control** – Multi-stage review processes and client approval workflows
- **Flexible Delivery** – Multi-format mastering supporting varied distribution requirements

Why Choose Our Studio

Strategic Advantages

1. **Balanced Team Structure** – Specialized departments with deep expertise ensure highest quality output while maintaining production efficiency
2. **Scalability** – 35-person team capable of expanding rapidly to handle large-scale international and domestic projects without compromising quality
3. **Cost-Effective Solutions** – Leverage India's competitive pricing advantage while delivering world-class, Hollywood-standard VFX
4. **Proven Delivery** – Successful collaborations with major production houses, studios, and commercial clients across multiple genres
5. **Global Standards** – Adherence to international quality benchmarks, security protocols, and professional workflows
6. **Local & Global Fluency** – Experience in delivering for both Indian cinema and international productions, understanding diverse requirements and cultural nuances
7. **Artist-Centric Approach** – Team of skilled professionals dedicated to creative excellence and technical precision
8. **Technology Forward** – Continuous adoption of emerging technologies (AI, real-time rendering, cloud workflows) to enhance efficiency and creativity

Project Approach

Collaborative Partnership Model

Our engagement process ensures alignment and exceptional results:

1. Consultation & Planning

- o In-depth project briefing and requirements gathering
- o Detailed technical assessment of project scope
- o Timeline estimation and resource planning
- o Budget and delivery schedule alignment

2. Concept & Planning

- o Creative concept development and storyboarding
- o Visual reference collection and style direction
- o Detailed shot breakdown and VFX requirements documentation
- o Previz and concept approval from client

3. Production

- o Dedicated team assignment based on project requirements
- o Regular progress updates and milestone reviews
- o Iterative feedback incorporation and refinements
- o Quality assurance at each stage

4. Delivery & Support

- o Multi-format output delivery (DCP, broadcast, streaming, web)
- o Post-delivery support and minor revisions
- o Asset archival and documentation
- o Ongoing partnership for future projects

Content Security & Professional Standards

- o **Confidentiality** – Strict NDA compliance and secure file handling protocols
- o **Data Security** – Encrypted communication, secure storage, and protected production environments
- o **Industry Compliance** – Adherence to DCI standards, broadcast specifications, and platform requirements
- o **Professional Standards** – ISO-compliant workflows, documented processes, and quality metrics

Looking Forward

The VFX industry stands at an inflection point with unprecedented growth opportunity. As demand for high-quality visual content continues accelerating across streaming, film, gaming, and immersive platforms, our studio is positioned to be a trusted partner for:

- o International productions seeking cost-effective, quality VFX solutions
- o Domestic projects requiring world-class visual storytelling
- o Emerging technologies (AR/VR, real-time rendering) integration
- o Long-term, scalable partnerships for ongoing production needs

Our combination of experienced talent, proven delivery capability, cost efficiency, and technological readiness makes us an ideal choice for projects of any scale.
